Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 11-16 are rejected under 35 U.S.C. 102(e) as being anticipated by the U.S. Published Application to Harrison (2003/0193842, filed 3/24/2003, with priority to Provisional application 60/395367, filed 7/12/2002).
2. The reference discloses a time display apparatus comprising: a display unit 101 (Fig. 10A) having an indicator portion 102 of variable area and a visual appearance (Fig. 10B) , said display area having a color display (par. 0182, line 9) ; and a controlling means 200 cooperative with said display unit for altering the area of said display unit in accordance with minutes of a time to be displayed on said display unit (Fig. 10B, par. 0184, lines 1-9), said controlling means for altering the visual appearance of said indicator portion without altering the area of said indicator portion

exclusively in accordance with an hour of the time to be displayed, said controlling means for altering a color of said indicator portion exclusively in accordance with an hour of the time to be displayed (par. 0182, line 10), said indicator portion having a generally rectangular bar shape (Figs. 10a, 10B, 14), said controlling means for altering a length of said bar shape, said indicator portion having a shape of a segment of an annulus (Fig. 16), said controlling means for altering a circumferential extent of the segment, said indicator portion having a shape of a segment of a circle (Figs. 11A, 11B), said controlling means for altering an angle subtended by the segment (i.e. from quarter to full moon), said controlling means for increasing the area of said indicator portion as a time value displayed increases (Figs. 10-19), said indicator portion formed by a portion of said liquid crystal display (par. 0126, line 3, 19-20).
